

## Shipboard Muldipol<sup>TM</sup> Antennas

### Models D7061-L and D7066-L

The **Muldipol<sup>TM</sup>** Multiple Collinear Array concept has been specifically developed by TACO for ground-air-ground, air traffic control, and associated land or sea based communication applications. This omni-directional concept employs a unique method of shielding the feed cables to improve radiation pattern characteristics. The **Muldipol<sup>TM</sup>** also has a high degree of isolation between discrete elements within a closely spaced array.

### Environmental

- Designed to comply to MIL-STD 810G
- Enclosed in fiberglass radome to protect from water and ice

### Electrical

- Isolation > 20dB
- Polarization Vertical
- Omni-directional +/- 1dB Uniformity (azimuth)
- VSWR < 2.5:1
- Terminals "N" Female
- Terminal Impedance 50 Ohm
- Vertical Beam Deviation +/- 10 degrees
- Maximum Input Power 350 Watt VHF, 250 Watt UHF

### Lightning Protection

- 3/8" x 4 1/4" long stainless steel lightning rod
- Internal grounding wire runs from lightning rod to stainless steel grounding lug at the base of the antenna
- Grounding lug fits up to 0.312" external ground wire connector

### Mounting Base

- Mounting holes support 6 x 1/2" bolts on 11 5/8" BCD
