

TACO<sup>TM</sup>  
ANTENNA

**TACO MULTIPOL<sup>TM</sup>**  
THE SMARTER ANTENNA

Save Space,  
Time and Money

## CONNECT UP TO FOUR RADIOS TO A SINGLE ANTENNA

### Save Space

A single TACO MULTIPOL can connect up to four radios in one antenna, making for cleaner towers and reduced interference.

### Save Time

Fewer antennas to install and service saves time, now and over the long term.

### Save Money

Fewer masts required, less weatherproofing, lower maintenance costs.

## Military Models

### D2000 Standard Series

The MULTIPOL<sup>TM</sup> Multiple Dipole Collinear Array concept employs a unique method of shielding the feed cables to improve radiation pattern characteristics.

The MULTIPOL<sup>TM</sup> also has a high degree of isolation between discrete elements within a closely spaced array. They have been specifically designed by TACO to be lightweight and compact for ground-air-ground, air traffic control and base communication military applications.

The result is small, rugged, easy to install antennas that minimize space and lend themselves to tactical transportable use in the most hostile environments. Many VHF and UHF frequency configurations are available with up to 4 connectors.

SPEC0070\_E01

### SPECIFICATIONS

#### Environmental

- Built to military standards
- Rain, salt-fog, sand, dust

#### Electrical

- Vertical Polarization
- Omni-directionality within 1 dB
- VSWR (max) 2:1 (except D2211, 2.3:1)
- Impedance 50 Ohms
- VHF Applied Power 350W
- UHF Applied Power 250W
- Vertical Beam Deviation  $\pm 10^\circ$  (horizon)
- Operating Temp.  $-40^\circ$  to  $70^\circ\text{C}$  ( $-40^\circ$  to  $158^\circ\text{F}$ )
- 'N' Female connectors

\* Wind Speed = 100 mph

\*\* Wind Speed = 50 mph

\*\*\* Safety Factor of 1.65 Included Per TIA-329

ALSO AVAILABLE:

- VHF & UHF multiple antenna combinations
- Series designed specifically for both shipboard and civil air traffic control installations
- Two piece, integrated LED and lightning finial models
