

CIVIL AVIATION YAGI ANTENNA

MODEL Y102B-130V

The Y102B-130V is a 118-137 MHz air traffic control 10 element Yagi antenna. The use of multiple driven elements allows our yagis to achieve high gain levels throughout their entire specified bandwidths. A single TACO Yagi's operational band typically covers a frequency range that would require as many as 3 standard Yagis. Each is furnished with an integrated 50 Ohm N-Female connector and includes a fiberglass mast fitted with coupling that center mounts to standard tower masts ranging from 1.66" to 2.875" OD.
