

TACOTM

ANTENNA UHF SATCOM

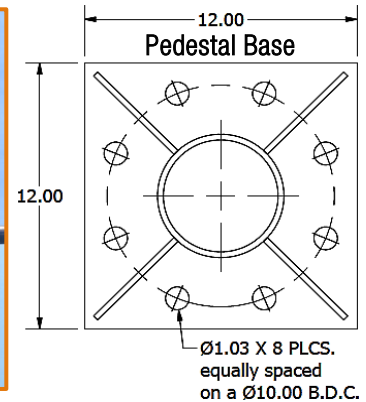

Fixed UHF SATCOM Helical Pedestal Mount

TACO's Helical Pedestal Mount was specifically designed for mounting two UHF SATCOM Helical antennas in an array configuration. Its superior and robust construction is intended for deployment in harsh environments. The mount features smooth elevation and azimuth adjustment during antenna positioning.

- Counter-weights & threaded rod for precise elevation & azimuth adjustment
- Accommodates 2.875 to 4.0 inch OD antenna mast range
- Predetermined antenna array spacing
- Designed for 200 mph wind
- Compact packaging
- Corrosion Resistant
- North American made

MOUNT SPECIFICATIONS

Height – in (cm)	86.6 (220.0)
Width – in (cm)	70.9 (180.2)
Weight – lbs (kg)	425.5 (193.0)
Azimuth Movement	360°
Elevation Movement	90°
Pedestal Material	Hot Dipped Galvanized Steel
