

### 2.4 GHz Power Divider

#### MODEL PD2-2.4-T

These power dividers allow more than one antenna to be connected to a radio to help shape RF signals for your wireless networks. Signal loss from the dividers need to be considered when added to your wireless access points.

See our electrical specifications below for more details.

#### Electrical Specifications

Frequency Range - MHz	2350 - 2550
VSWR	1.5:1
Splitting Loss - dB	3.1
Insertion Loss - dB	0.1
Terminal Type	N Female
Power rating - W	300

#### Mechanical Specifications

Material	Zinc Plated Steel
Weight - lbs (kg)	1.1 (0.5)

*TACO Antenna's ongoing policy of continuing development may result in specification changes to its products.*
